

Social Benefits Perspective

ACCC Increases State Income

- The activities of ACCC's 2006-07 student body will generate about \$10.6 million in labor income in the state economy each year (in the aggregate).
- Once ACCC's current students become active in the workforce, they will promote business output, raise consumer spending, and increase property income in the State. All of this contributes an additional \$5.4 million in taxable income each year.
- Altogether, higher student income and associated effects on business productivity add \$16.1 million in income annually to the state economy.

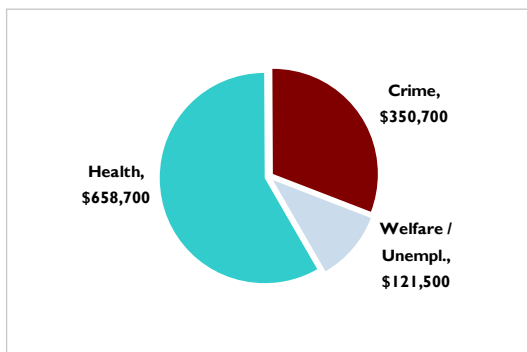

Increased Taxable Income

ACCC Reduces Social Costs

- Education is statistically correlated with improved lifestyle behaviors, including reduced incidences of absenteeism, alcohol abuse, and smoking, lower probability of committing crime, and fewer welfare and unemployment claims.

Social Savings Attributable to ACCC

- It is estimated that ACCC's 2006-07 student population will generate social savings equal to \$1.1 million a year, with \$658,700 in health savings, \$350,700 in law enforcement savings, and \$121,500 in welfare and unemployment savings.
- These savings accrue to all state and local residents—students, homeowners, businesses, and taxpayers.
